

UNDERSTANDING OUR ENVIRONMENT IN A FUN AND SCIENTIFIC WAY

Passionate about science, committed to the environment and the climate, we offer activities to raise awareness of environmental and climate issues, for citizens, school children, associations, public authorities or businesses.

What we offer

01

Workshops

We run workshops in Luxembourg and the Greater Region, in 4 languages, on biodiversity, climate, water, and low-carbon transition.

02

Events

We hosts educational and participatory events to raise awareness of environmental and climate issues for all audiences.

03

Community

A community of environmental facilitators fostering support, skill-sharing, and opportunities across the Greater Region.

04

Resources

Our materials cover climate, biodiversity, sustainable energy, and waste.

ABOUT US

At Environnement and Sustainability Education Luxembourg (ESE), we believe education is the key to a sustainable future. We combine science and pedagogy to raise awareness and foster action for sustainable development.

Our Values

- Accessibility
- Scientific rigor
- Commitment
- Cooperation
- Creativity

Our Objectives

- Raise awareness on environmental and climate challenges.
- Empower educators & communities with tools and skills.
- Support local action for a sustainable transition.

ESE.LU IN NUMBERS

Since 2022, ESE.lu has been empowering people across Luxembourg and the Greater Region to better understand and act on today's environmental challenges. Here's our impact so far:

- 31 facilitators (11 pros) driving change with 15 tools
- 2023 → 1,100 people inspired through 110 events
- 2024 → 1,245 people engaged in 78 activities
- Since 2022 → 3,345 people reached via 188 workshops (116 companies | 50 citizens | 22 schools)

Would you like to organize an environmental event in your company, with friends or at your children's school?

Do you have a question, a proposal or would you simply like to find out more about our actions?

SOME EDUCATIVE RESOURCES

We use reliable, up-to-date and accessible teaching resources, designed to convey environmental issues in a scientific, fun and age-appropriate way. Our materials cover key themes such as climate change, biodiversity, sustainable energy and waste management.

We use tools developed by recognized institutions as well as visual and scientific material to support our environmental awareness actions in Luxembourg.

The Climate Fresco

- A collaborative game to help you understand the causes and consequences of climate change, based on the latest 3,000-page IPCC report.
- Duration: 3h
- Participants: minimum 4
- Audience: general
- Languages: FR, DE, EN, PT

The Biodiversity Fresco

- To help people understand the issues and pressures surrounding biodiversity, based on the IPBES report, through a fun, collaborative, visual workshop accessible to all.
- Duration: 3h
- Participants: minimum 4
- Audience: general
- Languages: FR, EN

The Digital Fresco

- A collaborative game to help you understand the causes and consequences of our use of digital technology.
- Duration: 3h
- Participants: minimum 4
- Audience: general
- Languages: FR, DE, EN

2tons

- Collaborative game to find out all about reducing CO2 emissions: by taking individual and collective action, reduce the carbon footprint of the country's inhabitants!
- Duration: 3h
- Participants: 4 minimum
- Public: 15 years minimum
- Languages: FR, EN
